## DETAILED ACTION

### *Application and Claims Status*

1. Applicant's amendment filed 09/17/2004 are acknowledged and entered. Applicant amended the instant specification wherein added The SEQ. ID. Nos.
2. Claims 1-14 are currently pending.

### *Election/Restrictions*

3. This application contains claims directed to patentably distinct species of the claimed invention, i.e. claims 1-14. Election is required as follows.
4. Applicant is required to elect from the following patentably distinct species. Claim 1 is generic.

#### Subgroup 1: Species of an asymmetric monolayer forming species (e.g., see claim 1)

Applicant must elect for purposes of search a single specific asymmetric monolayer forming species. The election should result in a ***particular defined*** core structure that is shared by all members of the asymmetric monolayer forming species. In defining this core structure, all variable groups should be defined (i.e. all atoms and bonds shown) as much as possible.

#### Subgroup 2: Species of a population of a biological species (e.g., see claim 2)

Applicant must elect for purposes of search a single specific biological species. The election should result in a ***particular defined*** core structure that is shared by all members of the population of biological species. In defining this core structure, all variable groups should be defined (i.e. all atoms and bonds shown) as much as possible.

5. The species are distinct, each from the other, because their structures and modes of action are different. They would also differ in their reactivity and the starting materials from which

Art Unit: 1639

they are made. Moreover, the above species can be separately classified. Consequently, the species have different issues regarding patentability and represent patentably distinct subject matter. Therefore, this does create an undue search burden, and election for examination purposes as indicated is proper.

6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of the above species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

7. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

8. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

9. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention. Because the

Art Unit: 1639

above restriction/election requirement is complex, a telephone call to applicants to request an oral election was not made. See MPEP § 812.01.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
